SKILL	HANDS ON EXPERIENCE (YES / NO)	SELF GRADING (OUT OF 5)	EXAMPLE OF SOMETHING YOU DID IN THIS (You will be asked about it in detail)
1. Graph Databases	YES	3.5 / 5	Modeled complex social relationship data for 'follow' and 'like' features, optimizing the retrieval of interconnected user nodes.
2. GraphQL	YES	3.5 / 5	Implemented structured schemas to handle efficient data fetching for product catalogs with 10,000+ records, reducing API over-fetching significantly.
3. Selenium / Playwright / Puppeteer	YES	3.5 / 5	Developed a real-time web scraper to provide an AI chatbot with up-to-date web information for dynamic, context-aware interactions.
4. FastAPI	YES	5 / 5	Developed the end-to-end order and payment gateway infrastructure, including Cart Management, Coupon Validation, PayU integration, and Zoho Books for automated accounting and invoicing.
5. AI Agents	YES	4.5 / 5	Built a complex branching system for AI interactions using the ChatGPT API to deliver personalised, context-aware user experiences.
6. Strong Knowledge of Python	YES	5 / 5	Extensive use of Python for backend logic, AI integration, and building surveillance systems using the YOLOv8 object-detection model.
7. SQL for DB Management	YES	4 / 5	Managed PostgreSQL and MySQL databases to maintain transactional integrity between payment gateways and accounting software.
8. Core Technologies (Others)	YES	5 / 5	Core stack includes the MERN / MEAN Stack, Docker & Portainer for DevOps containerisation, and Azure for high-availability cloud deployments.
